EvenTofy

❖ PROJECT DESCRIPTION

- EvenTofy is a website which is designed to make event planning a easy process for users. It helps users organize events and schedules. It is an essential tool for your event planning and managing.

- Users can easily manage and plan events . The website allows them to send out invitations , customize the invitation design and message, and send it out via email or text. The website tracks reply from guests who has RSVP'd, making it easier for users to keep track of their guest list.

- EvenTofy helps you organize your schedule and sends you notification for your upcoming events. It is a user-friendly planner for all your big and small events either it be a wedding or a corporate event. Its features allow user to plan the event with ease. EvenTofy will handle all the details for you.

❖ FIRST PHASE EVALUTAION

- On opening the website, you will see the get started page that lets you login or register a new/existing account.
- After the authentication the page takes you to a homepage that lets you create a new event or manage an existing event.

❖ FURTHER PLANS:

- Create a page for new and existing events respectively.
- Further scheduling of the new events will be generated by the website.
- Sending invitations page using templates to the guest list provided by the user.
- Tracking of RSVPs
